We received the highest resistance ratings against the following household chemicals: vinegar, juices, ketchup, olive oil, hot/cold water, nail polish remover, ammonia, alcohol, Windex, Lysol, 409, coffee, and wine.

Commercial Grade Seating

Commercial Grade Seating is identified as Ci-//. Chairs without the “i” in the item number do not qualify.

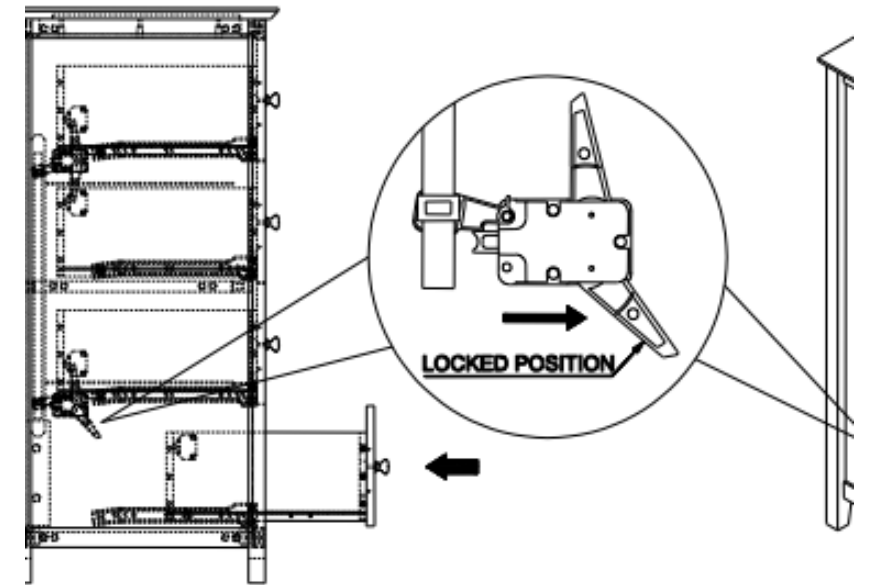

You must indicate, when ordering, the intention to use these chairs in commercial applications. Chairs ordered for commercial applications will also be enforced with “L” brackets at major stress points.

Interlock Glide System for Bedroom Anti-Tip Standards

To meet industry manufacturing standards (CPSC Anti-Tip Regulations) we use standard extension ball bearing glides in our bedroom case pieces. No soft close glides are available in bedroom case pieces.

The Interlock glide system is mounted on the inside of the unit onto numbered drawers. This ensures that only one drawer can open at a time, similar to how a file cabinet opens.

More is explained in each item's Product Assembly Instructions.
